Fifth Annual Greenstone Gold Mines Community BBQ

Greenstone Gold Mines (GGM) hosted its 5th Annual Community BBQ at its operational facility on Hardrock Road, near the historic Mosher headframe on Thursday August 17th. GGM's Director of Environment and Community Relations, Ian Horne, welcomed guests to the event and expressed GGM's appreciation for all the support it has received from the community. On hand for

the event was GGM's General Manager Eric Lamontagne who provided a brief Hardrock Project update stating that 'GGM looks forward to advancing the Hardrock Project and re-establishing the Geraldton-Beardmore Gold Camp that will generate benefits for the local communities and stakeholders'.

The event provided local residents, business owners,

stakeholders, First Nation members and Metis citizens with an opportunity to meet and discuss the project with Greenstone Gold Mines' team members who cooked and served hamburgers and hot dogs and were available to answer project related questions.

Since last year's BBQ Event, GGM achieved two significant project milestones, the completion of the

Hardrock Project Feasibility Study and the submission of the Final Environmental Assessment report to the federal and provincial regulatory agencies. GGM informed guests that there will be upcoming Public Information Centre events and comments on the Hardrock Project will be accepted until October 6th. To learn more about the Hardrock Project please visit www.greenstonegoldmines.com.
