

## ENVIRONMENT POLICY

At Greenstone Gold Mines, we value the environment in which we live and work. We commit to mine resources in an environmentally responsible manner. We believe environmentally responsible mining positively contributes to the sustainability and economies of the communities in which we operate.

To achieve this, Greenstone Gold Mines will:

- Provide clear leadership and accountability for our environmental performance.
- Set clear goals for environmental performance at our projects, monitor our progress and if required, apply adaptive management to meet those goals.
- Recognize the importance of risk management and continuous improvement throughout exploration, design, construction, operations and closure.
- Acknowledge the importance of consultation, local and traditional knowledge in understanding the environments in which we operate to develop and adapt our management plans.
- Provide training for employees and contractors on our environmental programs and procedures, and the resources necessary to implement this policy.
